❖ Trains specialists in the field of:

- Mathematics & Computer Sciences
- Physics
- Agronomics
- Agricultural Engineering
- Forest Management
- Veterinary Science
- Technology of Production & Processing of Agricultural Products

❖ Teachers of mathematics, informatics, physics, and robotics

Agricultural College

- ❖ Trains specialists in the field of:
 - Exploitation and Maintenance of Agricultural Machinery and Equipment
 - Mechanization of Agriculture
 - Land-Utilization
 - Agronomics
 - Dog Breeding
 - Veterinary Medicine

Science

GASU is a leading scientific center of the Altai Republic. Its interdisciplinary research activities are mainly focused on 6 key themes:

Studying, conserving, and reviving tangible and intangible heritage of peoples of Altai and its neighbouring territories

Studying the influence of climate change, manifestation of adverse natural conditions, and human impact on socio-, bio-, and geosystems of Altai

Sustainable wildlife management and biodiversity conservation

Assisting in the social and economic prosperity of the Greater Altai region through sustainable development of agriculture, alternative energy, and ecological tourism

Complex geophysical research in the territory of the Altai Republic

Complex research in the field of mathematics, electronics, programming, and information technologies

An integral part of the educational process and research activities in GASU are numerous field trips and expeditions

GASU has partners among educational and scientific institutions in Belgium, Germany, China, India, Kazakhstan, Korea, Kyrgyzstan, Mongolia, Tadzhikistan, France, and the USA.

Joint research projects

International cooperation

International students' mobility and academic exchanges

Export of educational services

International students

- Kazakhstan
- Kyrgyzstan
- China
- Tajikistan
- Turkmenistan
- Moldova
- Uzbekistan

SUNRAISE International Summer School

Graduates of the Russian Language Courses

Korean students participating in the archaeological expedition
